Vulnerability:	CWE-89: SQL Injection	Remediation Status:	FIXED (correction.txt)
AI Model Used:	Kimi 2.5 (Featherless AI)	Pipeline Output:	threat_remediation_report.pdf

1. Agent Execution Sequence

```
github_analyzer → CorrectionAgent → PDFBuilder
```

2. Original Vulnerable Code

Vulnerable Source File

```
# No original code supplied
```

3. Corrected Code Output (`correction.txt`)

Refactored Implementation

```
import sqlite3

def fetch_user(username):
    conn = sqlite3.connect("users.db")
    try:
        cursor = conn.cursor()
        cursor.execute("SELECT * FROM users WHERE username = ?", (username,))
        return cursor.fetchone()
    finally:
        conn.close()
```
